9. A system-on-panel typed liquid crystal display, comprising:

a substrate including at least first, second and third regions;

a pixel array formed on the substrate in the first region;

a driver formed on the substrate in the second region; and

a control unit formed on the substrate in the third region, wherein the control unit includes switching devices having at least one active layer formed of single crystalline silicon.

Please new add new claims 23-26 as follows:

--23. The system-on-panel typed liquid crystal display according to claim 1, wherein the substrate includes glass.
